SUMMARY

Economics graduate (B.B.A., Business Analytics emphasis) with experience in statistical research, predictive modeling, and financial decision support. Won Best in Show at the 2026 ASA DataFest at UGA, finishing #1 of 15 teams from schools including Emory, Clemson, and Mercer, by analyzing 7M+ real-world patient records under a 48-hour deadline. Additional experience managing budgets, forecasting costs, and translating data into clear recommendations as a Property Manager. Skilled in SQL, Python, R, and Excel, with strong written and verbal communication in English and Spanish.

EDUCATION & EXTRACURRICULARS

UNIVERSITY OF GEORGIA

Athens, GA

B.B.A. in Economics with Business Analytics Emphasis; Minor: Statistics and Sports Management || GPA: 3.6

May 2026

- Relevant Coursework: Econometrics, Data Science Models, Micro & Macroeconomics, Linear Regression, Competitive Strategy, Finance, Accounting, and Statistical Programming (taught in Jupyter Notebook)
- ECS: Economics Society, Association of Latino Professionals for America, Hispanic Student Association, and Intramural Soccer

RESEARCH EXPERIENCE

UGA ASA DATAFEST – TEAM 5SIGMA

Athens, GA

Competitor / Data Analyst

April 10–12, 2026

- Won Best in Show at the 2026 ASA DataFest at UGA, a 48-hour data analysis competition, finishing #1 of 15 teams from schools including Emory, Clemson, and Mercer, all working on the same unseen real-world dataset
- Built a working dataset from 7M+ patient encounters, engineering a recovery-timeline feature from ICD-10 fracture codes for 26,000+ patients, then ran chi-squared tests and a logistic regression to identify predictors of healing complications
- Interpreted the results to show that higher complication rates among MyChart users (odds ratio 1.52) reflected patients staying in the system rather than worse outcomes, and presented the findings and recommendations to the judging panel

ECONOMICS SOCIETY COHORT

Athens, GA

Research Associate

September 2025 – Present

- Selected through a competitive application process for a year-long, faculty-mentored research program involving both independent and collaborative econometric projects
- Use RStudio for statistical modeling, regression analysis, and data visualization, translating results for technical and non-technical audiences

TERRY COLLEGE OF BUSINESS – UGA ECONOMICS DEPARTMENT

Athens, GA

Economics Student

August 2024 – December 2024

- Built linear regression models in R on 46,000+ full-time workers from the CPS March 2022 (U.S. Census Bureau), estimating a 15% hourly wage gap between women and men that grows to 19% after controlling for education, demographics, and household characteristics

PROJECTS (github.com/david-barrero)

- **Hermès Bag Investment Analysis (R):** Advised a mock client using 1,255 Birkin and Kelly auction sales; a hedonic regression showed comparable bags lost about 3.7% of value per year, while the rising average price came from a shift toward rarer bags
- **Ames Home Price Prediction (R):** Compared five regression models with lasso and ridge on 460 held-out homes; the best model cut typical prediction error to \$32,800, while the model with the best in-sample fit overfit new data

RELEVANT EXPERIENCE

CAPIFUND PROPERTIES LLC

Athens, GA

Property Manager

August 2023 – Present

- Manage an annual operating budget of approximately \$20K per property by tracking expense trends, forecasting near-term costs, and checking spending against ownership's long-term investment goals
- Coordinate maintenance and capital repairs by sourcing contractors, building scheduling systems to reduce downtime, and enforcing safety and habitability standards
- Redesigned documentation and reporting workflows to reduce processing errors while enforcing lease compliance, maintaining ~100% occupancy across a residential portfolio

ATLANTA GLADIATORS

Duluth, GA

Operations Intern

September 2022 – December 2022

- Supported game-day operations for a pro hockey organization, running in-arena fan engagement activations and promotional distributions for crowds of ~500 fans per game
- Managed data entry and recordkeeping for the front office, keeping organizational records accurate across administrative functions

ADDITIONAL INFORMATION

- Technical: Excel (VLOOKUP, Pivot Tables, IF statements, Macros), Microsoft 365 (Word, PowerPoint, Outlook), SQL, Python, R, RStudio, Jupyter Notebook, Power BI (in progress, DataCamp), Statistical & Regression Modeling, JMP, Git/GitHub
- Languages: English (fluent), Spanish (fluent), German (beginner)
